

UCRB Draft EIS

Table of Contents

Volume 1

Acronyms	inside back cover
Summary	before Chapter 1

Chapter 1

<i>Introduction</i>	1
<i>Geographic Project and Planning Areas</i>	1
<i>Proposed Action</i>	2
<i>Purpose of and Need for Action</i>	2
<i>Purpose</i>	2
<i>Need</i>	6
<i>Changed Conditions</i>	6
<i>New Information and Understandings</i>	8
<i>Requirements or Authority for New Long-Term Management Direction</i>	8
<i>Management Priorities</i>	9
<i>Background</i>	10
<i>Decisions to Be Made</i>	11
<i>Planning Considerations</i>	11
<i>The Nature of Planning on National Forest System and BLM Lands</i>	11
<i>Status of Planning on National Forest System and BLM Lands</i>	12
<i>Implications of Planning for Multiple Administrative Units</i>	12
<i>This Assessment and EIS Process</i>	13
<i>What Has Been Accomplished to Date</i>	13
<i>What is Yet to be Accomplished</i>	13
<i>New Information and the Adaptability of Plans</i>	14
<i>Decisions That Will Be Made Through This Planning Process</i>	14
<i>Factors Affecting Implementation</i>	15
<i>Determination of Significance of Amendment Under the National Forest Management Act (NFMA)</i>	18
<i>Planning Criteria Under BLM Planning Regulations</i>	19
<i>Public Participation</i>	20
<i>Scoping: Invitation to the public</i>	20
<i>Next steps in the Planning Process</i>	21
<i>Issues that Emerged from the Scoping Process</i>	21

Chapter 2

<i>Introduction</i>	1
<i>Purpose and Organization of This Chapter</i>	1
<i>Historical Range of Variability</i>	2
<i>Positive Ecological Trends</i>	2
<i>How Information was Gathered and Presented</i>	3
<i>Ecological Reporting Units</i>	3
<i>Hydrologic Unit Codes</i>	4
<i>Clusters</i>	4
<i>Physical Environment</i>	7
<i>Introduction to Physical Environment</i>	7
<i>Geology and Physiography</i>	7

<i>Geologic Processes, Functions, and Patterns</i>	8
<i>Geology of UCRB Ecological Reporting Units</i>	8
<i>Columbia Plateau (ERU 5)</i>	8
<i>Blue Mountains (ERU 6)</i>	8
<i>Northern Glaciated Mountains, Upper Clark Fork, and Lower Clark Fork (ERUs 7, 8, and 9)</i>	8
<i>Owyhee Uplands (ERU 10)</i>	8
<i>Upper Snake (ERU 11)</i>	9
<i>Snake Headwaters (ERU 12)</i>	9
<i>Central Idaho Mountains (ERU 13)</i>	9
<i>Soils and Soil Productivity</i>	9
<i>Summary of Conditions and Trends</i>	9
<i>Soil Processes, Functions, and Patterns</i>	10
<i>Soil Horizons</i>	10
<i>Physical Properties</i>	10
<i>Biological Properties</i>	11
<i>Organic Matter</i>	11
<i>Fire</i>	11
<i>Current Conditions</i>	11
<i>General Trends</i>	11
<i>General Soil Characteristics and Productivity, by ERU</i>	12
<i>Climate</i>	13
<i>Precipitation and Temperature</i>	13
<i>Drought</i>	14
<i>Climate Change</i>	14
<i>Air Quality</i>	14
<i>Summary of Conditions and Trends</i>	14
<i>Historical Conditions</i>	14
<i>Current Conditions</i>	16
<i>Elements related to the Clean Air Act</i>	16
<i>Protection of National Ambient Air Quality Standards (NAAQSSs)</i>	16
<i>Conformity with State Implementation Plans</i>	17
<i>Protection of Visibility in Class I Areas</i>	17
<i>Managing Emissions From Prescribed Fire</i>	18
<i>Tracking Emissions</i>	18
<i>Monitoring Air Quality</i>	18
<i>Air Quality Tradeoffs Between Prescribed Fire and Wildfire Emissions</i>	18
<i>Terrestrial Ecosystems</i>	22
<i>Introduction to Terrestrial Ecosystems</i>	22
<i>Overview of Project Area Forestlands and Rangelands</i>	22
<i>Change on the Landscape</i>	23
<i>How Vegetation was Classified</i>	23
<i>Terrestrial Species: Overview</i>	26
<i>How Wildlife are Described</i>	26
<i>Federally Listed Threatened, Endangered, and Candidate Species</i>	30
<i>Species Viability and Other Aspects of Terrestrial Integrity</i>	30
<i>Rare Plants, Lichens, Bryophytes</i>	30
<i>Noxious Weeds</i>	35
<i>Natural Areas</i>	35
<i>Forestland</i>	36
<i>Summary of Conditions and Trends</i>	37
<i>Introduction to Forestlands</i>	37
<i>Succession and Disturbance</i>	38
<i>Terrestrial Wildlife Species and Habitats: General Considerations For All Forest PVGs</i>	39
<i>Rangelands in Forested Areas: Transitory Rangelands</i>	46
<i>Dry Forest Potential Vegetation Group</i>	47
<i>Distribution and Description</i>	47
<i>Composition and Structure</i>	47

<i>Historical Conditions</i>	48
<i>Current Conditions and Trends: Departures in Composition, Structure, and Disturbance Processes and Patterns</i>	48
<i>Terrestrial Species and Habitats in Dry Forests</i>	51
<i>Moist Forest Potential Vegetation Group</i>	59
<i>Distribution and Description</i>	59
<i>Composition and Structure</i>	59
<i>Historical Conditions</i>	62
<i>Current Conditions and Trends: Departures in Composition, Structure, and Disturbance Patterns and Processes</i>	63
<i>Terrestrial Species and Habitats in Moist Forests</i>	65
<i>Cold Forest Potential Vegetation Group</i>	67
<i>Distribution and Description</i>	67
<i>Composition and Structure</i>	68
<i>Historical Conditions</i>	68
<i>Current Conditions and Trends: Departures in Composition, Structure, and Disturbance Patterns and Processes</i>	69
<i>Terrestrial Species and Habitats in Cold Forests</i>	72
<i>Summary of Changes from Historical to Current by Ecological Reporting Unit, by Potential Vegetation Type, and by Terrestrial Community for BLM/Forest Service-Administered Lands</i>	74
Rangelands	76
<i>Summary of Conditions and Trends</i>	76
<i>Introduction to Rangelands</i>	77
<i>Dry Grass Potential Vegetation Group</i>	78
<i>Distribution and Description</i>	78
<i>Composition and Structure</i>	78
<i>Historical Conditions</i>	78
<i>Current Conditions: Departures in Composition, Structure, and Disturbance Patterns and Processes</i>	78
<i>Terrestrial Species and Habitats in Dry Grasslands</i>	79
<i>Dry Shrub PVG</i>	82
<i>Distribution and Description</i>	82
<i>Composition and Structure</i>	82
<i>Historical Conditions</i>	82
<i>Current Condition: Departures in Composition, Structure, and Disturbance Processes and Patterns</i>	83
<i>Rare, Endemic, and Special Dry Shrub Habitats</i>	83
<i>Terrestrial Species and Habitats in Dry and Cool Shrublands</i>	84
<i>Cool Shrub PVG</i>	85
<i>Distribution and Description</i>	85
<i>Composition and Structure</i>	86
<i>Historical Conditions</i>	86
<i>Current Condition: Departures in Structure, Composition, and Disturbance Processes and Patterns</i>	86
<i>Terrestrial Species and Habitats in Cool Shrublands</i>	87
<i>Key Factors Influencing Rangeland Vegetation</i>	87
<i>Livestock Grazing</i>	87
<i>Changes in Fire Regimes</i>	90
<i>Noxious Weeds, Exotics, and Introduced Forage Grasses</i>	90
<i>Climate and Disturbance Stresses</i>	98
<i>Other Factors Influencing Rangeland Health</i>	99
<i>Western Juniper and other Woody Species Expansion/Density Concerns</i>	99
<i>Microbiotic Crusts: Ecology and Implications for Rangeland Management</i>	100
<i>Livestock ~ Big Game Interactions</i>	101
<i>Summary of Changes from Historical to Current by Ecological Reporting Unit, by Potential Vegetation Type, and by Terrestrial Community for BLM/Forest Service-Administered Lands</i>	102

<i>Aquatic Ecosystems</i>	103
<i>Summary of Conditions and Trends</i>	105
<i>Introduction to Aquatic Ecosystems</i>	104
<i>Hydrology and Watershed Processes</i>	104
<i>Streams, Rivers, and Lakes</i>	105
<i>Summary of Conditions and Trends</i>	106
<i>Water Quantity and Quality</i>	106
<i>Water Quantity</i>	106
<i>Water Quality</i>	109
<i>Stream Channels</i>	110
<i>Stream Channel Processes, Functions, and Patterns</i>	110
<i>Current Conditions</i>	112
<i>Lakes</i>	115
<i>Riparian Areas and Wetlands</i>	116
<i>Summary of Conditions and Trends</i>	116
<i>Riparian and Wetland Processes, Functions, and Patterns</i>	116
<i>Physical Processes in Riparian Areas and Wetlands</i>	117
<i>Riparian and Wetland Vegetation</i>	119
<i>Riparian Terrestrial Species and Habitats</i>	120
<i>Current Conditions of Riparian Areas and Wetlands</i>	121
<i>Riparian Areas</i>	121
<i>Wetlands</i>	124
<i>Fish</i>	124
<i>Summary of Conditions and Trends</i>	124
<i>Current Conditions</i>	125
<i>Native Species</i>	126
<i>Introduced Species</i>	129
<i>Salmonids</i>	129
<i>Historical Overview</i>	129
<i>Key Salmonids</i>	130
<i>Native Species Richness, and Biotic and Genetic Integrity</i>	154
<i>Species Richness</i>	154
<i>Biotic Integrity</i>	156
<i>Genetic Integrity</i>	157
<i>Watershed Categories</i>	157
<i>Human Uses and Values</i>	160
<i>Summary of Conditions and Trends</i>	160
<i>Introduction to Human Uses and Values</i>	161
<i>Historical Overview</i>	161
<i>The Analytical Context for Human Uses and Values</i>	163
<i>Population</i>	164
<i>Wildland-Urban Interface</i>	164
<i>Land Ownership and Major Uses</i>	169
<i>Recreation and Scenery</i>	169
<i>Historical Overview</i>	169
<i>Recreation Use</i>	170
<i>Scenery</i>	171
<i>Issues in Recreation Management</i>	171
<i>Cultural Resources</i>	172
<i>Livestock Grazing</i>	172
<i>Commercial Timber Harvest and Other Forest Products</i>	174
<i>Special Forest Products</i>	175
<i>Minerals and Energy</i>	176
<i>Utility Corridors</i>	177
<i>Road System</i>	178
<i>Road Inventory</i>	178
<i>Construction and Maintenance Costs</i>	178

<i>Fire and Fuels Management</i>	179
<i>Local, Regional, and National Use</i>	181
<i>Generating Wealth versus Generating Value</i>	181
<i>Payments to Local Government</i>	181
<i>Economic Importance of Agency Timber and Forage to Counties</i>	182
<i>Overview of Employment</i>	182
<i>Regional Employment Status</i>	182
<i>Employment Associated with Forest Service- or BLM-administered Lands</i>	182
<i>Manufacturing</i>	185
<i>Agricultural Services and Farm Employment</i>	186
<i>Mineral Resources</i>	186
<i>Recreation</i>	186
<i>Forest Service and BLM Employment</i>	187
<i>Employment and Income</i>	187
<i>Population and Income Change by Trading Area</i>	188
<i>Economic Character of UCRB Counties and Communities</i>	190
<i>Communities</i>	190
<i>Conventional Notions of Community Stability</i>	191
<i>Timber Dependency</i>	192
<i>Isolated Timber Dependent Communities</i>	192
<i>Predictability of Supply and Processing of National Forest Timber</i>	192
<i>Expectations of Timber Supply</i>	193
<i>Timber Projections for the Upper Columbia Basin Draft EIS</i>	193
<i>Federal Policy and Actions Supporting Community Stability</i>	193
<i>Rangelands Administered by the BLM</i>	194
<i>Forest Service Timber Policy and Communities</i>	194
<i>Even Flow and Timber Supply</i>	195
<i>Community Resiliency</i>	195
<i>Population Size and Growth</i>	196
<i>Economic Diversity</i>	196
<i>Community Social and Cultural Attributes</i>	198
<i>Amenity Setting</i>	199
<i>Quality of Life</i>	200
<i>Attitudes, Beliefs, and Values</i>	200
<i>Role of the Public in Public Land Management</i>	201
<i>American Indians</i>	203
<i>Summary of Conditions and Trends</i>	203
<i>Introduction to American Indians</i>	204
<i>Cultures</i>	204
<i>Changes in Uses of and Relationships with the Land</i>	208
<i>Legal Agreements</i>	210
<i>Federal Trust Responsibility</i>	210
<i>Other Agreements</i>	211
<i>Tribal Governments</i>	211
<i>Current Federal Agency Relations</i>	212
<i>American Indian Issues</i>	212
<i>Trust Obligation</i>	212
<i>Consultation/Participation</i>	213
<i>Community Well-Being</i>	213
<i>Sensitive Tribal Species</i>	214
<i>Restoration</i>	214
<i>Place Attachment</i>	215
<i>Harvestability</i>	215
<i>Cultural Resource and Cultural Practices Protection</i>	215
<i>Accountability</i>	215
<i>Consultation</i>	216
<i>Integrated Summary of Forestland, Rangeland, and Aquatic Integrity</i>	220

<i>Introduction</i>	220
<i>Measuring Integrity</i>	221
<i>Landscape Features</i>	221
<i>Fish Communities</i>	221
<i>Integrity Layers</i>	222
<i>Terrestrial Habitat Departures</i>	222
<i>The Clusters</i>	222
<i>Forest Clusters</i>	225
<i>Forest Cluster 1</i>	225
<i>Forest Cluster 2</i>	225
<i>Forest Cluster 3</i>	226
<i>Forest Cluster 4</i>	226
<i>Forest Cluster 5</i>	226
<i>Forest Cluster 6</i>	226
<i>Range Clusters</i>	227
<i>Range Cluster 1 ~ Juniper Woodlands</i>	227
<i>Range Cluster 2 ~ High Integrity Dry Forest Ranges</i>	227
<i>Range Cluster 3 ~ Moderate Integrity Dry Forest Ranges</i>	229
<i>Range Cluster 4 ~ Columbia Shrub Steppe/Croplands</i>	229
<i>Range Cluster 5 ~ Moderate Integrity Upland Shrublands</i>	229
<i>Range Cluster 6 ~ Low Integrity Upland Shrublands</i>	230
<i>Composite Ecological Integrity</i>	230

Chapter 3

<i>Introduction</i>	1
<i>Alternatives Considered But Eliminated From Detailed Study</i>	1
<i>Development of Alternatives Considered in Detail</i>	1
<i>Mitigation</i>	2
<i>Description of the Alternatives</i>	4
<i>Management Emphases</i>	4
<i>Alternative 1</i>	6
<i>Theme</i>	6
<i>What is the Design of Alternative 1?</i>	6
<i>Desired Range of Future Conditions</i>	7
<i>Resource Management</i>	11
<i>Forestland</i>	11
<i>Rangeland</i>	11
<i>Disturbances</i>	11
<i>Wildlife Habitat</i>	12
<i>Soil and Water</i>	12
<i>Riparian Areas</i>	12
<i>Social and Economic</i>	12
<i>Alternative 2</i>	13
<i>Theme</i>	13
<i>What is the Design of Alternative 2?</i>	13
<i>Desired Range of Future Conditions</i>	16
<i>Features Common to Alternatives 3 through 7</i>	17
<i>Goals</i>	17
<i>Desired Range of Future Conditions</i>	17
<i>Soils</i>	17
<i>Terrestrial Ecosystems</i>	18
<i>Aquatic Ecosystems</i>	19
<i>Human Uses and Values</i>	19
<i>American Indians</i>	20
<i>Alternative 3</i>	20

<i>Theme</i>	20
<i>What is the Design of Alternative 3?</i>	21
<i>Desired Range of Future Conditions</i>	21
<i>Terrestrial Ecosystems ~ Forestlands</i>	25
<i>Forest Wildlife Habitat</i>	25
<i>Terrestrial Ecosystems ~ Rangelands</i>	26
<i>Rangeland Wildlife Habitat</i>	26
<i>Aquatic Ecosystems</i>	26
<i>Aquatic Species Habitat</i>	27
<i>Human Uses and Values</i>	27
<i>Alternative 4</i>	28
<i>Theme</i>	28
<i>What is the Design of Alternative 4?</i>	28
<i>Desired Range of Future Conditions</i>	29
<i>Terrestrial Ecosystems~ Forestlands</i>	29
<i>Terrestrial Ecosystems~ Rangelands</i>	33
<i>Aquatic Ecosystems</i>	34
<i>Human Uses and Values</i>	35
<i>Alternative 5</i>	35
<i>Theme</i>	35
<i>What is the Design of Alternative 5?</i>	36
<i>Desired Range of Future Conditions</i>	36
<i>Terrestrial Ecosystems ~ Forestlands</i>	36
<i>Terrestrial Ecosystems ~ Rangelands</i>	43
<i>Aquatic Ecosystems</i>	44
<i>Human Uses and Values</i>	45
<i>Alternative 6</i>	45
<i>Theme</i>	45
<i>What is the Design of Alternative 6?</i>	45
<i>Desired Range of Future Conditions</i>	48
<i>Alternative 7</i>	48
<i>Theme</i>	48
<i>What is the Design of Alternative 7?</i>	51
<i>Desired Range of Future Conditions</i>	54
<i>Terrestrial Ecosystems~ Forestlands</i>	54
<i>Terrestrial Ecosystems~ Rangelands</i>	56
<i>Aquatic Ecosystems</i>	58
<i>Human Uses and Values</i>	58
<i>Objectives and Standards</i>	59
<i>Definitions</i>	59
<i>Alternative 1</i>	60
<i>Physical Environment</i>	60
<i>Soil</i>	60
<i>Air Quality</i>	60
<i>Physical Environments</i>	60
<i>Terrestrial Ecosystems</i>	60
<i>Aquatic Ecosystems</i>	63
<i>Human Uses and Values</i>	64
<i>Implementation, Adaptive Management, and Monitoring</i>	65
<i>Alternative 2</i>	65
<i>Physical Environment</i>	65
<i>Terrestrial Ecosystems</i>	65
<i>Forested Lands</i>	65
<i>Rangelands</i>	65
<i>Terrestrial Species and Habitats</i>	65
<i>Wilderness and Reserves</i>	66
<i>Aquatic Ecosystems</i>	66

<i>Human Uses and Values</i>	70
<i>Implementation, Adaptive Management, and Monitoring</i>	70
<i>Alternatives 3 through 7</i>	70
<i>Landscape Approach</i>	70
<i>Scale of Analysis</i>	70
<i>Process versus Prescriptive/Interim versus Permanent Standards</i>	70
<i>Interpretation of Activity Tables</i>	71
<i>Roads Standards</i>	71
<i>Relationship of Alternatives 1 and 2 to Table 3-5</i>	71
<i>Navigating Table 3-5</i>	71
<i>Index to Objectives and Standards in Table 3-5</i>	72
<i>Comparison of Alternatives</i>	173
<i>Differences Between the Alternatives</i>	174
<i>Comparison of the Effects of the Alternatives</i>	176
<i>Effects on Forest Health and Natural Disturbance Processes</i>	189
<i>Effects on Rangeland Health and Natural Disturbance Processes</i>	190
<i>Effects on Aquatic and Riparian Health</i>	191
<i>Aquatic Health</i>	191
<i>Riparian Health</i>	192
<i>Effects on Landscape Health</i>	192
<i>Effects on Long-Term Viable Populations of Terrestrial Species</i>	193
<i>Effects on Long-term Recovery and Delisting of Threatened and Endangered Species</i>	193
<i>Effects on Federal Trust Responsibilities and Tribal Rights and Interests</i>	194
<i>Effects on the Level of Annual Goods and Services</i>	194
<i>Effects on Community Vitality and Resiliency</i>	195
<i>Effects on Quality of Life for Project Area Residents</i>	195
<i>A User's Guide to the "Action" Alternatives</i>	198
<i>Rangelands</i>	198
<i>Forestlands</i>	202

Chapter 4

<i>Introduction</i>	1
<i>How the Chapter is Organized</i>	1
<i>Relationship to the Science Integration Team's Evaluation of Alternatives</i>	1
<i>How the Effects of the Alternatives Were Estimated</i>	2
<i>Source and Nature of Data and Databases</i>	2
<i>Principal Analytical Techniques</i>	3
<i>Incomplete and Unavailable Information</i>	3
<i>Requirements, Conclusions</i>	3
<i>Scale of Decision</i>	4
<i>Subsequent Analysis Before Projects</i>	4
<i>Monitoring and Review</i>	4
<i>Cumulative Effects</i>	5
<i>Cumulative Effects on Federal Lands</i>	5
<i>Cumulative Effects on Non-Federal Land</i>	5
<i>Cumulative Effects from Non-Federal Actions</i>	6
<i>Cumulative Effects in Subsequent Environmental Analysis</i>	6
<i>Other Environmental Consequences</i>	7
<i>Assumptions</i>	7
<i>Effects of the Alternatives on Physical Aspects of the Ecosystem</i>	8
<i>Soils</i>	8
<i>Summary of Key Effects and Conclusions</i>	8
<i>Assumptions</i>	8
<i>Causes of the Effects of Each Alternative on Soils</i>	9
<i>Methodology: How Effects on Soils Were Estimated</i>	9

<i>Effects of the Alternatives on Soil Productivity and Function</i>	10
<i>Effects on Soil Disturbance</i>	10
<i>Levels of Woody Material</i>	13
<i>Vegetation Conditions Trending Towards Historical Range of Variability</i>	14
<i>Watershed Restoration and Road Closures that Restore Soil and Hydrologic Function</i>	15
<i>Cumulative Effects on Soil Productivity</i>	16
<i>Air Quality</i>	17
<i>Summary of Key Effects and Conclusions</i>	17
<i>Assumptions</i>	17
<i>Visuals and Smoke</i>	17
<i>Other Pollutants</i>	17
<i>Causes of the Effects of Each Alternative on Air Quality</i>	18
<i>Methodology: How Effects on Air Quality were Estimated</i>	18
<i>Prescribed Fire Scenarios</i>	18
<i>Wildfire Scenarios</i>	19
<i>Use of Models</i>	20
<i>Effects of the Alternatives on Air Quality</i>	22
<i>Criteria Pollutants</i>	22
<i>Predicted Air Quality Impacts</i>	22
<i>Visibility</i>	23
<i>Conclusions</i>	26
<i>Effects of the Alternatives on Terrestrial Aspects of the Ecosystem</i>	28
<i>Forestlands</i>	28
<i>Summary of Key Effects and Conclusions</i>	28
<i>Assumptions</i>	28
<i>Limitations</i>	30
<i>Causes of the Effects of Each Alternative on Forestlands</i>	34
<i>Trends</i>	34
<i>Management Actions</i>	35
<i>Methodology: How Effects on Forestlands were Estimated</i>	35
<i>Simulation Strategies</i>	35
<i>Fire and Forest Insect and Disease Disturbance Regimes</i>	36
<i>Effects of the Alternatives on Forestlands</i>	36
<i>Introduction</i>	36
<i>Effects on Forest Distribution, Composition, and Structure</i>	36
<i>Effects on Successional and Disturbance Regimes of Forest Communities</i>	49
<i>Cumulative Effects</i>	64
<i>Rangelands</i>	73
<i>Summary of Key Effects and Conclusions</i>	73
<i>Assumptions</i>	73
<i>Rangeland Vegetation</i>	73
<i>Noxious Weeds</i>	75
<i>Causes of the Effects of Each Alternative on Rangelands</i>	76
<i>Methodology: How Effects on Rangelands were Estimated</i>	76
<i>Effects of the Alternatives on Rangelands</i>	77
<i>Introduction</i>	77
<i>Effects on Rangeland Distribution, Composition, and Structure</i>	77
<i>Effects on Major Factors Influencing Rangelands</i>	83
<i>Effects on Noxious Weeds, Exotics, and Introduced Forage Grasses</i>	84
<i>Effects on Climate and Disturbance Stresses</i>	93
<i>Effects on Other Factors Affecting Rangeland Health</i>	94
<i>Terrestrial Species</i>	96
<i>Summary of Key Effects and Conclusions</i>	96
<i>Assumptions</i>	96
<i>Limitations</i>	97
<i>Causes of the Effects of Each Alternative on Terrestrial Species Habitats or Populations</i>	98

<i>Methodology: How Terrestrial Species were Evaluated by the Science Integration Team</i>	99
<i>Methods for Assessing Species and Habitat Outcomes for Alternatives.....</i>	99
<i>EIS Team Application of Science Integration Team Information</i>	104
<i>Effects of the Alternatives on Terrestrial Species</i>	104
<i>General Trends: Terrestrial Species and Habitats At Risk</i>	104
<i>Species at Risk Which Show Little Change in Outcome Class by Alternative</i>	105
<i>Results from Analysis of Species Groups</i>	111
<i>Cumulative Effects</i>	129
<i>Threatened and Endangered Species.....</i>	130
<i>Mid-Seral Multi-Layer Forest</i>	130
<i>Aquatic Priority Areas in Alternative 5</i>	130
<i>Fire Occurrence and Habitat Stability in Alternative 7</i>	130
<i>Noxious Weeds and Exotic Plants</i>	130
<i>Known Bottlenecks, Fragmentation, and Corridors</i>	131
<i>Effects of the Alternatives on Aquatic Aspects of the Ecosystem.....</i>	132
<i>Aquatic Systems.....</i>	132
<i>Summary of Key Effects and Conclusions</i>	132
<i>Assumptions</i>	132
<i>Causes of the Effects of Each Alternative on Aquatic Ecosystems</i>	135
<i>Methodology: How Effects on Aquatic Systems were Estimated by the Science Integration Team</i>	135
<i>Qualitative Evaluation of the Overall Level of Protection, Maintenance, or Restoration of Aquatic and Riparian Habitats.....</i>	135
<i>Quantitative and Qualitative Evaluation of Expected Changes in the Distribution and Status of Key Salmonid Species</i>	136
<i>Evaluation of Narrowly Distributed Endemic or Sensitive Taxa</i>	136
<i>EIS Team Application of SIT Information</i>	136
<i>Effects of the Alternatives on Aquatic Systems</i>	137
<i>Effects on Hydrology, Watershed Processes, and Riparian Areas and Wetlands</i>	137
<i>Aquatic Species</i>	143
<i>Aquatic Mollusks</i>	143
<i>Introduced Fish Species</i>	143
<i>Native Fish Species</i>	143
<i>Cumulative Effects</i>	153
<i>Effects of the Alternatives on Landscape Health</i>	156
<i>Introduction</i>	156
<i>Variables and Predicted Results</i>	157
<i>Summary</i>	162
<i>Effects of the Alternatives on Human Uses and Values</i>	164
<i>Summary of Key Effects and Conclusions</i>	164
<i>Assumptions</i>	164
<i>Causes of the Effects on Human Uses and Values</i>	165
<i>Methodology: How Effects Were Estimated</i>	165
<i>Economics Science Evaluation</i>	165
<i>Social Science Evaluation</i>	166
<i>EIS Team Effects Evaluation</i>	166
<i>Effects on Annual Level of Goods and Services</i>	167
<i>Benefits Expected from Alternatives</i>	167
<i>Measured Benefits</i>	167
<i>Unmeasured Benefits</i>	167
<i>Calculating Outputs</i>	167
<i>Effects on Permitted Mineral and Energy Operations</i>	175
<i>Effects on Utility Corridors</i>	176
<i>Effects on Long-Term Wildfire Management and Post-Fire Recovery Costs</i>	176
<i>Effects of the Alternatives on National Forest System Inventoried Roadless Areas</i>	177
<i>Effects of Each Alternative on Community Vitality and Resiliency</i>	177
<i>Employment</i>	178
<i>Economically Vulnerable Areas</i>	180

<i>Investing in Vulnerable Areas or the Wildland-Urban Interface</i>	184
<i>Areas with High Risk at the Wildland-Urban Interface</i>	184
<i>Rate of Implementation</i>	184
<i>Public Participation and Collaboration</i>	187
<i>Effect on Quality of Life of Project Area Residents</i>	187
<i>Understanding Quality of Life</i>	187
<i>Different Viewpoints on Quality of Life</i>	188
<i>Individuals</i>	188
<i>County Government</i>	189
<i>Risk and Uncertainty</i>	190
<i>Long-Term Predictability</i>	190
<i>Short-Term Predictability</i>	190
<i>Effects of the Alternatives on American Indians</i>	191
<i>Summary of Key Effects and Conclusions</i>	191
<i>Assumptions</i>	191
<i>Causes of Effects on American Indians/Tribes</i>	192
<i>Methodology: How Effects on American Indians/Tribes were Estimated</i>	193
<i>Evaluation Methods for Habitat Trends</i>	193
<i>Estimation of Effects on American Indians/Tribes</i>	194
<i>Effects of the Alternatives on American Indians/Tribes</i>	194
<i>Agency-Tribal Relations</i>	195
<i>Cultural Uses</i>	197
<i>Water-Land Well-Being</i>	198
<i>Water</i>	198
<i>Hydrologic Functions</i>	199
<i>Soil</i>	199
<i>Air</i>	199
<i>Habitats and Species Groupings</i>	200
<i>Aquatic Species</i>	200
<i>Terrestrial Animals and Plants</i>	201
<i>Landscape Ecology</i>	203
<i>Cultural Uses</i>	204
<i>Composite Ecological Integrity Trends</i>	205
<i>Social Well-Being</i>	206
<i>Composite Ecological Integrity</i>	207
<i>Effects of the Alternatives on Ecological Integrity and Social/Economic Resiliency</i>	210
<i>Ecological Integrity</i>	210
<i>Current</i>	210
<i>Future Trends</i>	210
<i>Methodology</i>	210
<i>Results</i>	211
<i>Social/Economic Resiliency</i>	211
<i>Current</i>	211
<i>Future Trends</i>	212
<i>Methodology</i>	212
<i>Results</i>	212
<i>Managing Multiple Risks</i>	213
<i>Current</i>	213
<i>Future Trends</i>	213
<i>Cost Analysis</i>	215
<i>Assumptions</i>	215
<i>Methodology</i>	215
<i>Results</i>	217
<i>Sensitivity Analysis</i>	217

Chapter 5

<i>List of Preparers</i>	1
<i>Interior Columbia Basin Ecosystem Management Project Leadership Team</i>	1
<i>Interior Columbia Basin Ecosystem Management Project EIS Team-Document Preparers and Team Leaders</i>	2
<i>Former UCRB EIS Team Members</i>	4
<i>Science Integration Team</i>	5
<i>Economics</i>	5
<i>Social</i>	6
<i>Landscape Ecology</i>	6
<i>Spatial</i>	7
<i>Aquatics</i>	7
<i>Terrestrial</i>	8
<i>Other Contributors</i>	9
<i>Resource Specialists, Public Affairs, and Administration</i>	9
<i>Representatives of Regulatory Agencies</i>	10
<i>Geographic Information System Mapping Support</i>	10
<i>Tribal Liaison Group</i>	10
<i>Special Review Groups</i>	11
<i>Interior Columbia Basin Ecosystem Management Project Legal Team</i>	11
<i>Upper Columbia River Basin Field Advisory Team</i>	11
<i>Senior Level Team</i>	11
<i>Forest Service Regional Office and BLM State Office Representatives</i>	11
<i>Distribution List</i>	12
